# IXYS Integrated Circuits Product Catalog 2018 - 2019

High Voltage, Analog & Mixed Signal ICs, Optically Isolated Devices

**IXYS**  
A Littelfuse Technology

## IXYS Integrated Circuits

IXYS Integrated Circuits, formerly a wholly owned subsidiary of IXYS Corporation, is now part of Littelfuse. IXYS Integrated Circuits designs, manufactures, and markets a wide variety of semiconductor devices and is a major provider of optically isolated electronic components.

IXYS Integrated Circuits' unique mix of high voltage wafer fabrication, isolation barrier expertise, multi-chip packaging experience, and expertise in analog, mixed signal, and power design, points the way to greater functionality in a smaller footprint at lower cost for your designs.

### Products and Markets

- **IGBT and MOSFET Drivers:** High voltage, low-side, and optically isolated IGBT and MOSFET drivers, many of which are AEC-Q100 qualified.
- **High Voltage ICs:** High voltage 8-channel and 16-channel analog switches for the medical and imaging markets, high voltage LED drivers, and others.
- **Solid State Relays (SSR):** One of the industry's broadest lines of optically isolated SSRs, available in a wide selection of configurations, blocking voltages, and load currents.
- **Power Market:** Power solid state relays; SCR-based AC power switches (zero-cross & rapid turn-on); and N-channel, depletion-mode, field effect transistors (FET).
- **Lighting:** High voltage LED drivers.
- **High Speed Digital Optical Isolators:** High speed isolators that pass DC signals, require no refresh clocking, and provide  $3750V_{rms}$  of galvanic isolation.
- **I<sup>2</sup>C Optically Isolated Bus Repeaters:** New high speed repeaters that buffer both I<sup>2</sup>C signals, require no refresh clocking, and provide  $3750V_{rms}$  of galvanic isolation.
- **Portable reader devices:** Drivers for ePaper readers and displays.
- **RFID Devices:** Read-Only and HDX devices for single transponder applications operating in the low frequency (134.2 kHz) range, and supporting ISO 11784/85 standards.
- **Non-volatile Digitally Programmable Capacitors:** Provide capacitive offset trimming for capacitance sensitive circuits.
- **Telecommunications:** a broad range of products:
  - LITELINK® silicon Data Access Arrangement (DAA)
  - Phone-line interface and monitoring devices
  - LCAS: Line Card Access Switch products
  - DC Termination devices for xDSL and ISDN applications
  - Cybergate™ DAA

# SOLID STATE RELAYS

**Type BI** relays conduct load current in both directions.

**Type BI+** relays, in BI configuration, conduct load current in both directions.

**Type UNI** relays conduct load current from the positive terminal to the negative terminal only.

**Type BI+** relays, in UNI configuration with output MOSFETs wired in parallel, enable higher load current from positive terminal to negative terminal only.

The accompanying SSR tables reference these types (BI, BI+, & UNI) for all devices listed.

- **Replace electromechanical relays**
- **Replace mechanical switches**
- **Implement computer control of electromechanical circuits**

### Features:

- Low drive current
- High reliability
- No EMI/RFI generation
- Arc-free with no snubbing circuits
- AC or DC switching
- Current limiting devices available
- FCC compatible
- Low off-state leakage

### Applications:

- Telecommunications/data communications
- Instrumentation
- Multiplexers
- Data acquisition/electronic switching
- Meters (Watt-hour, water, gas)
- Medical equipment (patient/equipment isolation)
- Security
- Aerospace
- Industrial controls

# FAULT PROTECTED RELAYS

## CURRENT LIMITING SSRs WITH VOLTAGE TRIGGERED SHUTDOWN & THERMAL MANAGEMENT

- Active current-limiting circuitry
- Integrated thermal management (ThM)
- Voltage triggered shutdown (VTS)

- Provide excellent power-cross immunity
- Ideal for use in electromagnetically noisy environments
- Resumes normal operation after faults are removed

Part Number	Blocking Voltage (V <sub>p</sub> )	Input Control Current (mA)	On-Resistance (Maximum)		Load Current (Maximum)		Current Limit (Maximum)		* VTS Threshold (V <sub>TH</sub> ) (V)	Switching Speed (t <sub>on</sub> / t <sub>off</sub> ) (ms)	Isolation Voltage (V <sub>rms</sub> )	Package Type	Features & Comments
			DC-Only (Ω)	AC (Ω)	DC-Only (mA)	AC (mA)	DC-Only (mA <sub>p</sub> )	AC (mA <sub>p</sub> )					
CPC1510	250	2	3.75	15	350	200	920	450	-	2 / 2	3750	12, 14	Industrial applications

CPC1563	600	2	11.75	35	250	120	570	285	100	2 / 2	3750	12, 14	High blocking voltage
CPC1593	600	2	11.75	35	250	120	570	285	21	2 / 2	3750	12, 14	Power supply start-up

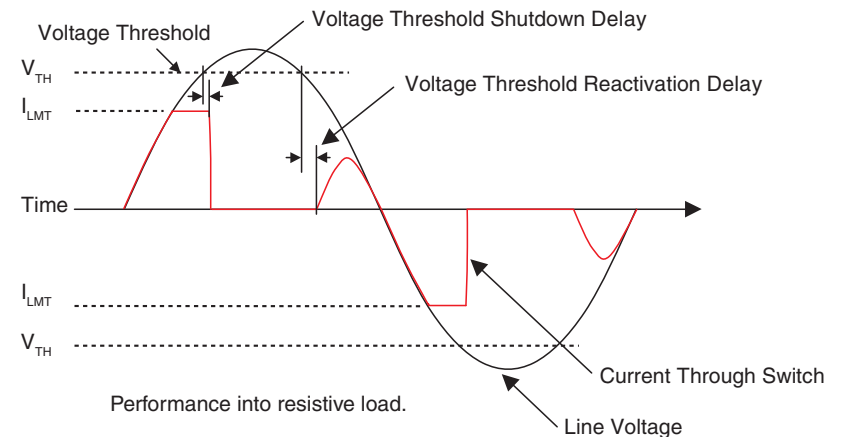

\* Deactivates the switch when the load voltage exceeds the V<sub>TH</sub> threshold while the switch is in current limit.

### CPC1540, CPC1563, CPC1593

### Applications:

- Telephony hook switch
- VoIP gateways
- I/O subsystems
- Electronic switching
- Medical equipment (Patient/equipment isolation)
- Security
- Aerospace
- Industrial controls

For data sheets, go to [www.ixysic.com/Products/ProdList.htm](http://www.ixysic.com/Products/ProdList.htm)

# OPTICALLY ISOLATED POWER RELAYS

- Blocking voltage up to  $1000V_p$
- On-resistance as low as 0.05 Ohms
- On/off times from 1ms to 25ms
- MOSFET-based AC/DC and DC-only power relays
- Load current up to  $22.8A_{DC}$  (with  $5^\circ C/W$  heat sink)
- $2500V_{rms}$  to  $5000V_{rms}$  isolation from input to output and to DCB substrate

**Features:**

- Isolated, low thermal impedance pad for heat sink applications
- Low input control current
- Low thermal impedances, junction to case ( $\theta_{JC}$ ):
  - 0.30°C/W - ISOPLUS-264
  - 0.35°C/W - i4-PAC
  - 1.50°C/W - Power SIP
  - 1.50°C/W - Power SOIC

**Applications:**

- Robotics
- Medical equipment
- Railroad/traffic controls
- Consumer appliances
- Industrial control
- Test and measurement equipment

**Metallized, external, Direct Copper Bond (DCB) surface for heat sink applications**

66 - Power SOIC

36 - Power SIP

29 - i4-PAC

37 - ISOPLUS-264

# OPTICALLY ISOLATED AC POWER SWITCHES

## • OPTICALLY ISOLATED AC POWER SWITCHES: LOAD CURRENT $\leq 1A$

- Blocking voltage from  $400V_p$  to  $800V_p$
- SCR-based AC power switches
- Maximum load current up to  $1A_{rms}$

### Features:

- Load current up to  $1A_{rms}$
- Blocking voltage up to  $800V_p$
- 5mA input sensitivity
- Zero-cross turn on  $\leq \frac{1}{2}$  Cycle
- Low EMI and RFI generation
- DC control, AC switching
- Optically isolated
- TTL and CMOS compatible
- High noise immunity
- Machine insertable, wave solderable

### Applications:

- Programmable controls
- Process control
- Power control panels
- Remote switching
- Gas pump electronics
- Large relay control circuits
- Contactors
- Solenoids
- Motor controls
- Heater controls

Zero-Cross Turn-On

Part Number	Blocking Voltage ( $V_p$ )	Load Current ( $A_{rms}$ )	Input Control Current (mA)	Operating Frequency Min / Max (Hz)	Isolation Voltage ( $V_{rms}$ )	Package Type

<sup>1</sup> Maximum continuous load current of a single pole or the sum of the load currents with both poles operating simultaneously.

## • OPTICALLY ISOLATED AC POWER SWITCHES: LOAD CURRENT >1A

- Blocking voltages of 600V<sub>p</sub> and 800V<sub>p</sub>
- SCR-based AC power switches
- Zero-cross and Rapid turn-on (non-zero-cross) versions

*Metallized, external, Direct Copper Bond (DCB) surface for heat sink applications*

29 - i4-PAC

36 - Power SIP

64 - SuperSIP

66 - Power SOIC

### \* Rapid turn-on (non-zero-cross)

Rapid turn-on devices turn on when the control input goes true regardless of the load voltage phase, and turn off when the load current crosses zero.

Part Number	Blocking Voltage (V <sub>p</sub> )	Load Current			Input Control Current (mA)	Input Control Voltage (V)	Operating Frequency Min / Max (Hz)	Turn-On: Zero-Cross or Rapid	Switching Speed t <sub>on</sub> / t <sub>off</sub> (max)	Isolation Voltage (V <sub>rms</sub> )	Package Type	Features

# MULTIFUNCTION PRODUCTS: SSR/OPTOCOUPLEDERS

## • GENERAL PURPOSE MULTIFUNCTION PRODUCTS (TELECOM MULTIFUNCTION PRODUCTS - PAGE 41)

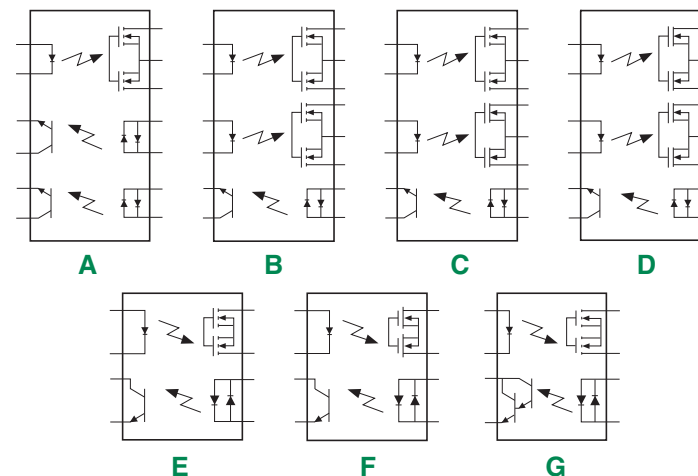

The OptoMOS line of Multifunction Products combines a number of discrete, optically isolated functions into a single package. These products mix and match solid state relays, optocouplers, and Darlington transistors to create highly functional circuits in a single, small package. Multifunction devices allow designers to consolidate circuit functions into a single device, thus freeing up valuable board space and reducing component count.

### Features:

- 3750V<sub>rms</sub> input-to-output isolation
- Multiple functionality in a single package
- Current limiting (part numbers with “L” suffix)
- Machine insertable, wave solderable
- TTL and CMOS compatible

### Applications:

- Telecommunication/datacommunication
- Instrumentation
- I/O subsystems/electronic switching
- Medical equipment (patient/equipment isolation)
- Security
- Aerospace
- Industrial controls

Part Number	Style	SSR Characteristics				Optocoupler Characteristics				Isolation Voltage (V <sub>rms</sub> )	Package Type	Features and Comments
		Blocking Voltage (V <sub>p</sub> )	Current Handling (mA)	On Resistance (Ω)	Input Control Current (mA)	Breakdown Voltage (V)	Current Transfer Ratio (%)	Saturation Voltage (V)	Input Control Current (mA)			
IAA110	B	350	100	35	5	20	33	0.5	6	3750	4	Two 1-Form-A relays, one optocoupler
IAB110	C	350	100	35	5	20	33	0.5	6	3750	4	One 1-Form-A relay, one 1-Form-B relay, one optocoupler
IAD110	A	350	100	35	5	20	33	0.5	6	3750	4	One 1-Form-A relay, two optocouplers

# FIELD EFFECT TRANSISTORS

## • N-CHANNEL DEPLETION MODE FETs

- Normally closed MOSFETs present low resistance with no power applied
- Ideal for security applications
- IGBT speed enhancement
- LED drivers

Part Number	$V_{(BR)DSX}$	$I_D$	$R_{DS(on)}$	$V_{GS(off)}$		Package Type	Features & Comments
	(V)			Min (mA)	Max ( $\Omega$ )		
CPC3701	60	600	1	-1.4	-3.1	SOT-89	
CPC3703	250	360	4	-1.6	-3.9	SOT-89	
CPC3708	350	130	14	-2	-3.6	SOT-89, SOT-223	
CPC3710	250	220	10	-1.6	-3.9	SOT-89

CPC3720	350	130	22	-1.6	-3.9	SOT-89	
CPC3730	350	140	35	-1.6	-3.9	SOT-89	
CPC3902	250	400	2.5	-1.4	-3.1	SOT-89, SOT-223	
CPC3909	400	300	6	-1.4	-3.1	SOT-89, SOT-223	
CPC3960	600	100	44	-1.4	-3.1	SOT-223	
CPC3980	800	100	45	-1.4	-3.1	SOT-223	
CPC3982	800	20	380	-1.4	-3.1	SOT-23	Very small package
CPC5602	350	130	14	-2	-3.6	SOT-223	Designed for use with LITELINK designs
CPC5603	415	130	14	-2	-3.6	SOT-223	Designed for use with LITELINK designs

### Features:

- Normally closed depletion mode devices offer low  $R_{DS(on)}$  at cold temperatures
- Low on-resistance
- High input impedance
- Low  $V_{GS(off)}$  voltage

### Applications:

- Power fail switches
- Discrete normally closed relays
- Constant current, high brightness LED drivers
- High voltage pre-regulators
- Power inverters
- Power supplies

### N-Channel Depletion Mode MOSFET as Pre-Regulator

See Application Note AN-500  
 “Depletion-Mode Power MOSFETs and Applications”

IXD_630M	SINGLE	30	0.4	I, N, D	•	$V_{CC} \leq 9$	57, 58

**Features:**

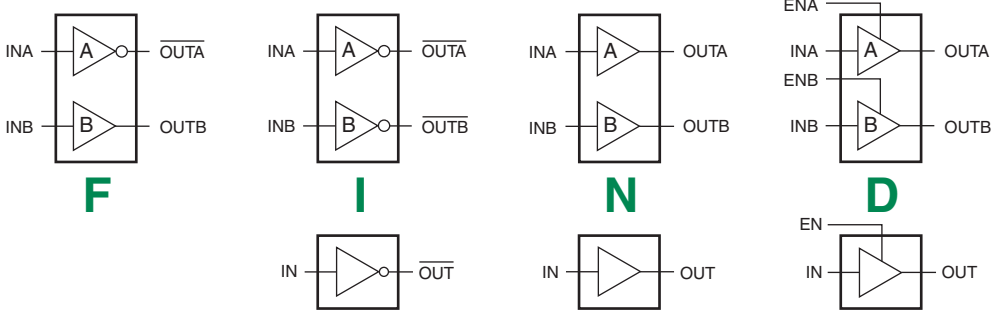

- 1.5A to 30A peak source/sink drive current
- Wide operating voltage range
- -40°C to +125°C extended operating temperature range
- Logic input withstands negative swing of up to -5V
- Matched rise and fall times
- Low propagation delay time
- Low output impedance

**Applications:**

- Efficient power MOSFET and IGBT switching
- Switch mode power supplies
- Motor controls
- DC to DC converters
- Class-D switching amplifiers
- Pulse transformer driver

### AEC-Q100 Qualified Low-Side Gate Drivers

Part Number	Output Type	$I_{PEAK}$ $T_C=25^\circ C$ (A <sub>P</sub> )	Output Resistance (Ω)	Available Logic Configurations	Enable Function	Package Type

## • IX2113: 600V HIGH-SIDE & LOW-SIDE GATE DRIVER

- High-side channel can drive an N-channel power MOSFET or IGBT 600V from the common reference
- Configured with independent high-side and low-side referenced output channels

### Features:

- Floating channel for bootstrap operation up to 600V with an absolute maximum rating of 700V
- Outputs capable of sourcing and sinking 2A
- Gate drive supply range from 10V to 20V
- Tolerant to negative voltage transients: dV/dt immune
- 3.3V logic compatible
- Under-voltage lockout for both high-side and low-side outputs
- Matched propagation delays

## • IX21844: HIGH VOLTAGE HALF-BRIDGE GATE DRIVER

- Programmable dead-time can be set between 400ns and 5 $\mu$ s
- Floating high-side channel can drive an N-channel power MOSFET or IGBT 600V from the common reference

### Features:

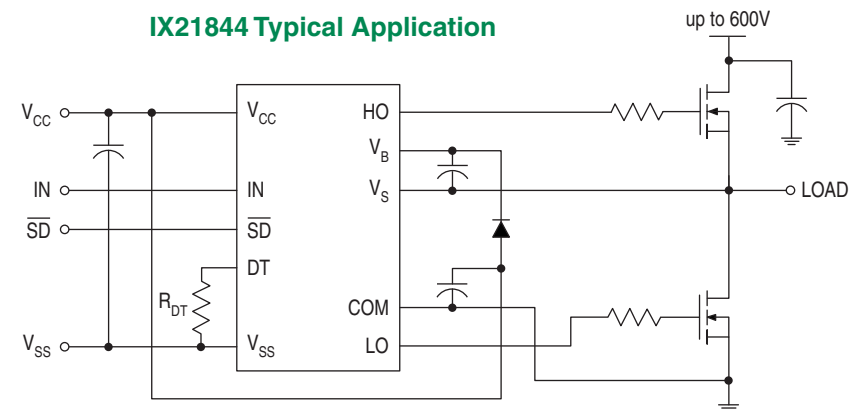

- Floating channel for bootstrap operation to 600V with an absolute maximum rating of 700V
- Outputs can source 1.4A and sink 1.8A
- Gate drive supply range from 10V to 20V
- Tolerant to negative voltage transients: dV/dt immune
- 3.3V and 5V logic compatible
- Under-voltage lockout for both high-side and low-side outputs
- Matched propagation delays

### Applications:

- Switch mode power supplies
- Motor driver inverters
- DC/DC converters
- Uninterruptable power supplies (UPS)

### IX21844 Typical Application

## IX2120: 1200V HIGH AND LOW SIDE GATE DRIVER

- Floating channel for bootstrap operation to +1200V
- Outputs capable of sourcing and sinking 2A

### Features:

- Gate drive supply range from 15V to 20V
- Enhanced robustness due to SOI process
- Tolerant to negative voltage transients: dV/dt immune
- 3.3V logic compatible
- Undervoltage lockout for both high-side and low-side outputs

IX2120 Functional Block Diagram

## IX2127: 600V HIGH SIDE IGBT & MOSFET GATE DRIVER

- Stable operation in high dV/dt noise environments
- Outputs typically source 250mA and sink 500mA

### Features:

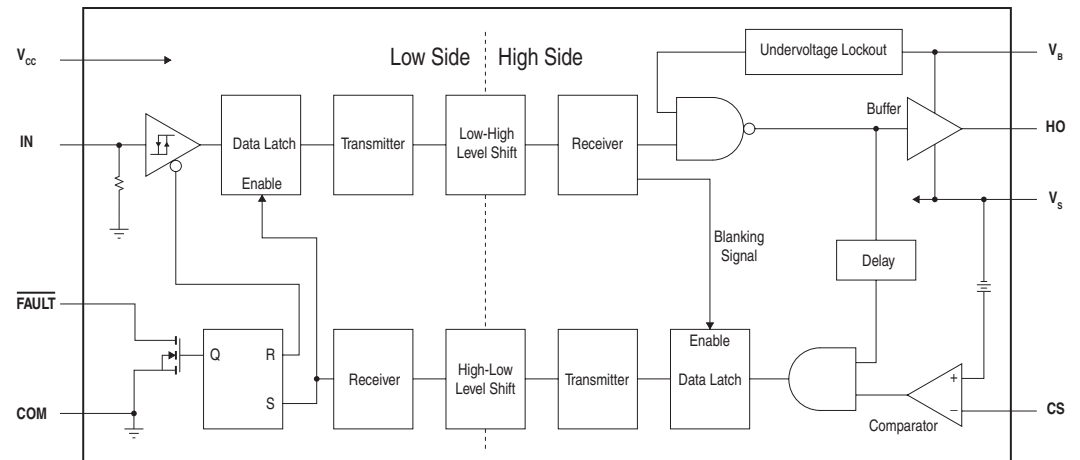

- Floating channel designed for bootstrap operation up to 600V
- Tolerant to negative transient voltages; dV/dt immune
- Under-voltage lockout
- 3.3V, 5V, and 12V input logic compatible
- Open-drain FAULT indicator pin shows over-current shutdown
- Output in-phase with the input

### Applications:

- High speed gate driver
- Motor drive inverter

IX2127 Functional Block Diagram

## • IX3120: 2.5A OUTPUT OPTICALLY COUPLED GATE DRIVER

- 2.5A maximum peak output current
- Wide operating voltage range: 15V to 30V

### Features:

- 25kV/ $\mu$ s minimum common-mode rejection (CMR) at 1500V<sub>CM</sub>
- Under-voltage lockout with hysteresis
- 3750V<sub>rms</sub> input-to-output isolation
- Wide temperature range: -40°C to +100°C

### Applications:

- Isolated IGBT/MOSFET gate drive
- Switch mode power supplies
- Industrial inverters
- Motor drivers

Ideally suited for use in motor control and inverter applications due to its low input LED current, high output peak current, and high noise immunity (25kV/ $\mu$ s).

## • IX3180: 2.5A OUTPUT HI SPEED GATE DRIVER OPTOCOUPLER

- 2.5A maximum peak output current
- Wide operating voltage range: 10V to 20V

### Features:

- 200ns maximum propagation delay over temperature range
- 20ns typical pulse width distortion
- 10kV/ $\mu$ s minimum common-mode rejection (CMR) at 1500V<sub>CM</sub>
- Wide operating voltage range: 10V to 20V
- Under-voltage lockout with hysteresis
- 3750V<sub>rms</sub> input-to-output isolation
- Wide temperature range: -40°C to +100°C

### Applications:

- High performance DC/DC converters
- High performance switching power supplies
- Motor control inverter applications
- Motor drivers

## • OPTICALLY ISOLATED LOAD-BIASED GATE DRIVERS

- High speed, optically isolated gate driver ICs
- Output driver powered from load voltage; no external power supply required
- On-chip circuitry charges an external capacitor whose charge enables fast turn-on

CPC1590 Application Diagram

### Features:

- No external IC power supply
- Low drive power requirements (TTL/CMOS compatible)
- Load voltages up to 200V
- Fast switching times - 40µsec on, 400µsec off

### Applications:

- Instrumentation
- Multiplexers
- I/O subsystems
- Meters (Watt-Hour, water, gas)
- Medical equipment (patient/equipment isolation)
- Security
- Aerospace
- Industrial controls

Part Number	Input Control Current (mA)	Gate Voltage @ $I_F=5\text{mA}$ ( $V_G$ )	Blocking Voltage ( $V_P$ )	Regulated Capacitor Voltage ( $V_{CAP-MAX}$ )	Switching Speeds $t_{on} / t_{off}$ (µs)	Isolation Voltage ( $V_{rms}$ )
CPC1580	2.5	7.5 - 12	65	$V_{DS} - 0.2V$	40 / 400	3750
CPC1590	2.5	7.5 - 12	200	16	40 / 400	3750

## • CPC1596: 570V OPTICALLY ISOLATED LOAD-BIASED GATE DRIVER

### Features:

- Requires No Load-side Power Supply
- Drives External Power MOSFET
- Only 2.5mA Input LED Current to Drive External MOSFET
- 3750Vrms Input-to-Output Isolation

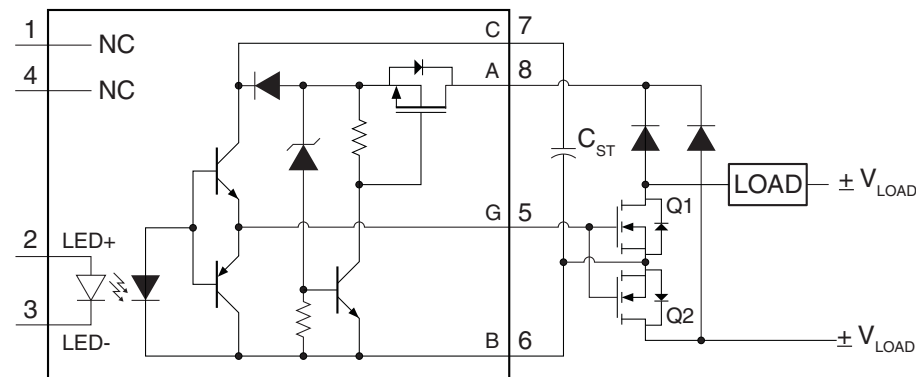

### Applications:

Optically Isolated AC or DC Relays for:

- Industrial Controls
- Instrumentation
- Medical Equipment Isolation
- Electronic Switching
- I/O Subsystems
- Appliances

CPC1596

CPC1596 AC Application Circuit

# High Voltage Products

## High Voltage Analog Switch Arrays

### Features:

- Flexible high voltage supplies up to  $V_{PP} - V_{NN} = 200V$
- Output switch on-resistance typically  $20\Omega$
- Low charge injection, low capacitance analog switches
- Very low quiescent current: 30nA typical
- -58dB off-isolation at 5MHz
- Internal bleed resistors: CPC7232 & CPC7701

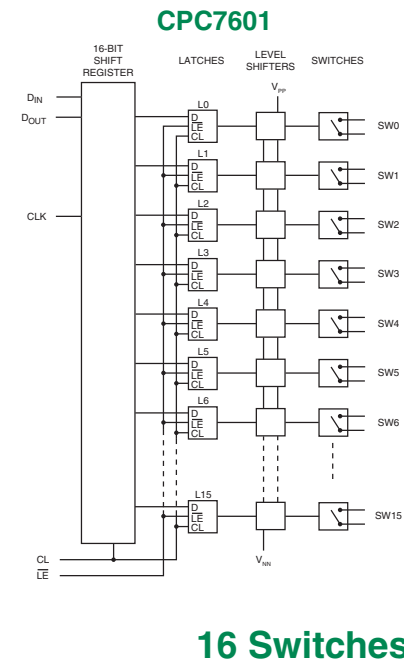

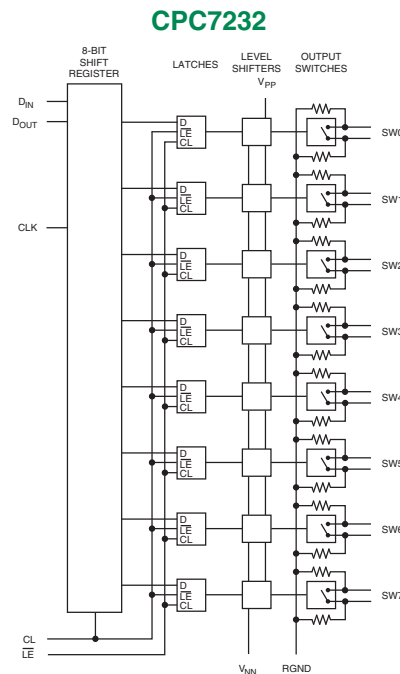

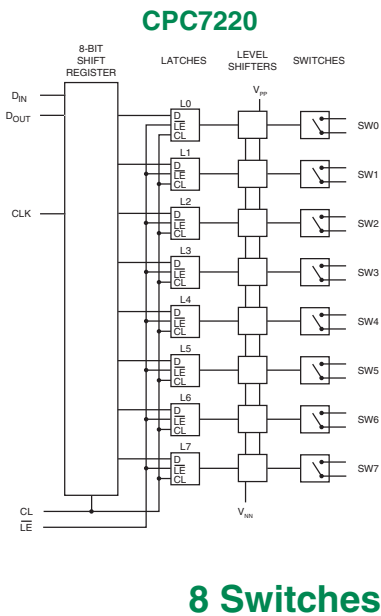

### Applications:

- Piezoelectric transducer drivers
- Ultrasound imaging
- Printers
- Industrial controls and measurement

Part Number	Number of Channels	Channel On-Resistance ( $\Omega$ )	Bleed Resistors (k $\Omega$ )	Clock Frequency (MHz)	Turn-On Time ( $\mu$ s)	Turn-Off Time ( $\mu$ s)	Package Type
CPC7220	8	20	-	5	5	5	50
CPC7232	8	21	20 - 50	5	5	5	50
CPC7601	16	25	-	8	5	5	50
CPC7701	16	25	20 - 50	8	5	5	50

50

## • HIGH VOLTAGE ISOLATED ANALOG SWITCHES

### CPC7524: 600V Quad High Voltage Isolated Analog Switch Array

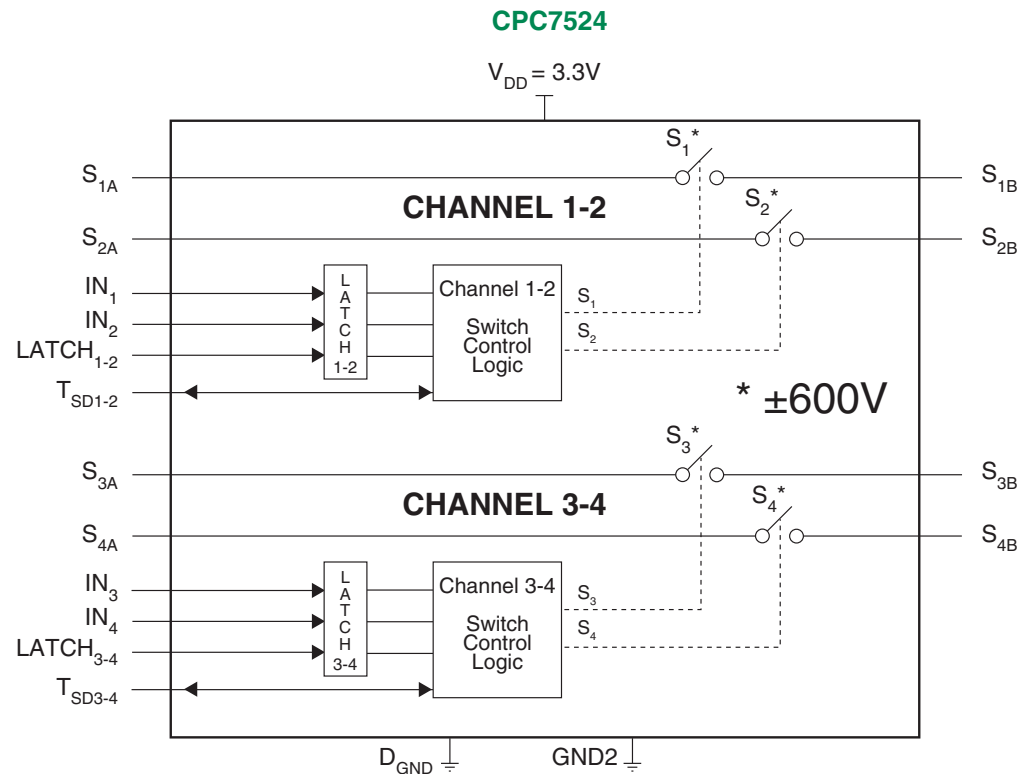

- Provides flexible single-ended or differential access to high voltage networks
- Configured as two sets of matched, paired switches for improved differential performance

#### Features:

- Switch voltage up to 600V
- 110dB switch-to-switch isolation at 5kHz
- Flexible switch configurations
- Smart logic for power-up/hot-plug state control
- **3.3V operation** with very low power consumption
- Switch current limiting and thermal shutdown protect against fault conditions
- TTL logic-level inputs
- Input latch
- Matched  $R_{ON}$
- Clean, bounce-free switching
- Monolithic IC reliability
- 28-pin SOIC package

#### Applications:

- Instrumentation
- Industrial controls and monitoring
- Automatic test equipment (ATE)
- Battery monitoring and charging circuits
- Worldwide AC mains monitor

For data sheets, go to [www.ixysic.com/Products/ProdList.htm](http://www.ixysic.com/Products/ProdList.htm)

## CPC7514: 320V Quad High Voltage Isolated Analog Switch Array

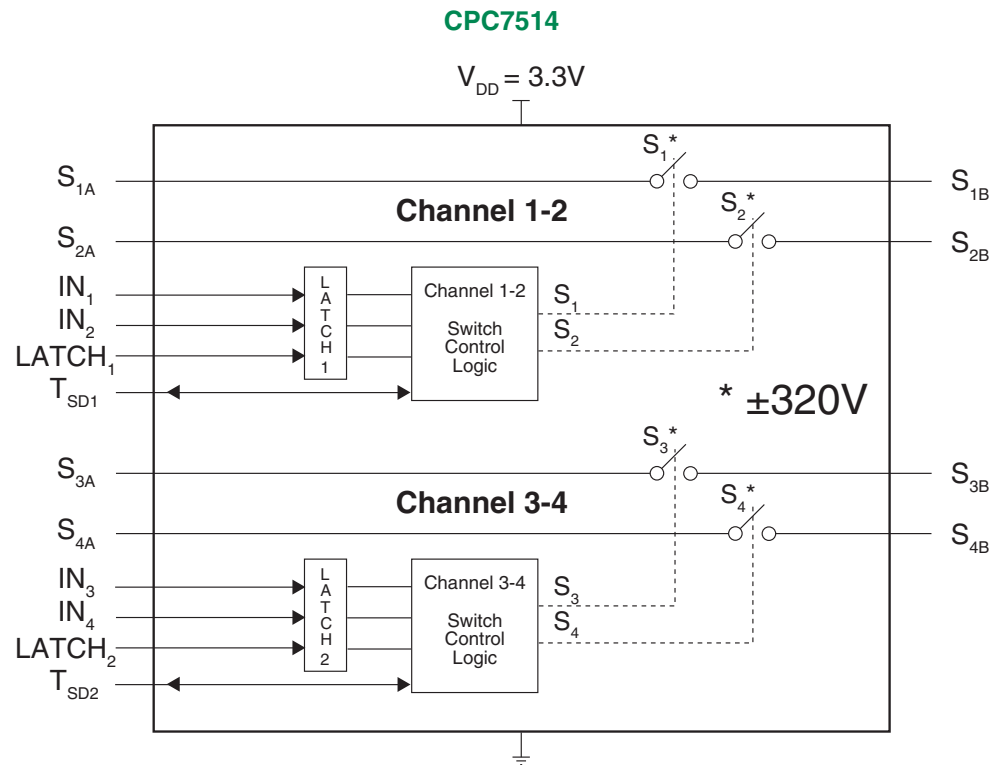

- Provides single-ended or differential access to high voltage networks
- Self-biasing - no external high-voltage supplies required

### Features:

- Low, matched  $R_{ON}$
- Switch voltage up to  $\pm 320V$
- 320V logic-input-to-switch-output isolation
- 110dB switch-to-switch isolation at 5kHz
- Flexible switch configurations
- Smart logic for power-up/hot-plug state control
- **3.3V operation** with very low power consumption
- Switch current limiting protects against fault conditions
- Thermal shutdown protects against fault conditions
- Latched TTL logic level inputs
- Clean, bounce-free switching
- Monolithic IC reliability

### Applications:

- Instrumentation
- Industrial controls and monitoring
- Automatic test equipment (ATE)
- Battery charging circuits
- Telephony
  - VoIP gateways
  - Central office (CO) and remote terminal (RT)
  - Concentrators
  - PBX systems
  - Optical network terminals (ONT)
  - Optical network units (ONU)
  - Hybrid fiber coax (HFC)

# CPC7512: 320V Dual Shunt-Isolated High Voltage High Frequency Analog Switch

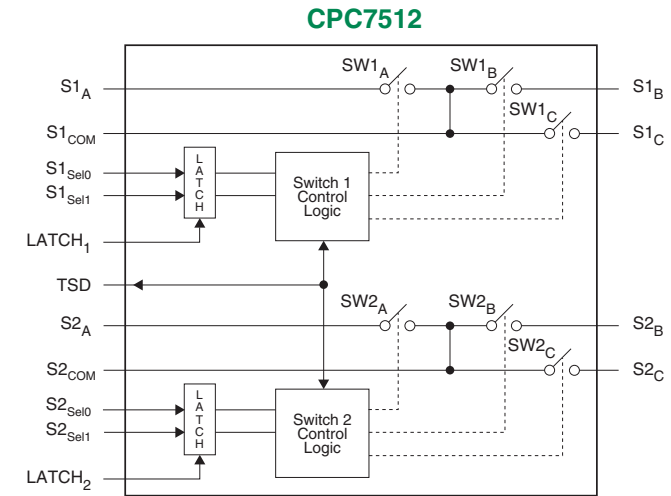

- Provides single-ended or differential access to high voltage networks
- Self-biasing: no external high-voltage supplies required

### Features:

- Low, matched  $R_{ON}$
- Guaranteed break-before-make (BBM)
- Switch voltage up to  $\pm 320V$
- 60dB off-isolation at 1MHz
- Smart logic for power-up/hot-plug state control
- 5V operation with very low power consumption
- Thermal shutdown protects against fault conditions
- Latched TTL logic level inputs

### Applications:

- Instrumentation
- Industrial controls and monitoring
- Multiplexed ultrasonic transducer switching
- Automatic test equipment (ATE)
- Battery monitoring and charging

$$\text{Insertion Loss} = +20 \log \frac{V_S}{V_M}$$

$$\text{Open Circuit} = +20 \log \frac{V_M}{V_S}$$

$$\text{Crosstalk} = +20 \log \frac{V_M}{V_S}$$

Insertion Loss Into  $50\Omega$

Open Circuit Transfer Gain into  $50\Omega$

Crosstalk into  $50\Omega$

# High Speed Digital Optical Isolators

## • OPTICALLY ISOLATED I<sup>2</sup>C BUS REPEATERS: CPC5902 & CPC5903

- CPC5902 bidirectionally buffers clock and data signals
- CPC5903 bidirectionally buffers data signal, unidirectionally buffers clock signal
- Logic level translation for levels as low as 2.7V or as high as 5.5V
- Passes DC signals - no refresh clock needed - no clock noise generated

See Application Note TB-101  
"Optically Isolating an I<sup>2</sup>C Interface"

### CPC5902 Features:

- Bidirectionally buffers both I<sup>2</sup>C signals
- Extends and isolates I<sup>2</sup>C interfaces
- Supports standard and fast mode I<sup>2</sup>C (400kbps)
- Side B fast-mode compliant:  $V_{DDB} > 4.5V$
- Supports I<sup>2</sup>C clock stretching
- No internal clock - low EM & RF generation
- Operates on 2.7V to 5.5V
- Supports DC logic level buffering without refresh
- Glitch-free operation
- Power down to Hi-Z does not load I<sup>2</sup>C bus
- Slew-limited drivers reduce EMI
- Immune to external EMI & RF emissions
- High voltage isolation

### CPC5903 Features:

- Bidirectionally buffers SDA I<sup>2</sup>C signal
- Side A extends and isolates I<sup>2</sup>C interfaces
- Standard-mode and fast-mode I<sup>2</sup>C
- Side B fast-mode compliant:  $V_{DDB} > 4.5V$
- Operates on 2.7V to 5.5V
- No internal clock - low EM & RF generation
- Voltage level translation
- Slew-limited drivers reduce EMI
- Power down to Hi-Z does not load I<sup>2</sup>C bus
- 3750V<sub>rms</sub> galvanic isolation
- Immune to external EMI & RF emissions
- High voltage isolation

### Applications:

- Power-over-Ethernet (POE)
- I<sup>2</sup>C bus length extender
- Isolated control and signal monitoring
- Power supply high-side interface
- I<sup>2</sup>C logic level translation

CPC5902

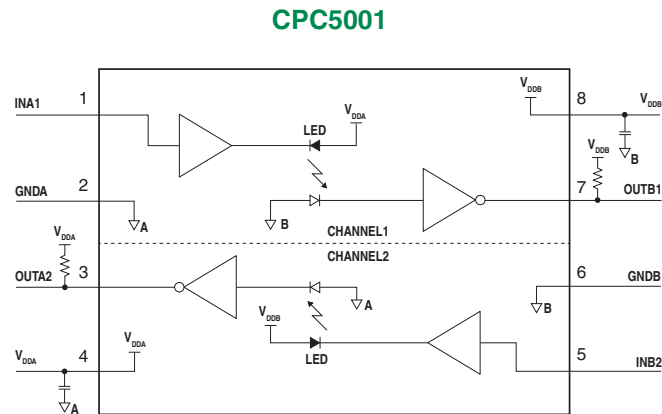

CPC5903

## • SINGLE-CHANNEL EACH DIRECTION DIGITAL OPTICAL ISOLATOR: CPC5001

- Logic level translation for levels as low as 2.7V or as high as 5.5V
- Passes DC signals - no refresh clock needed

### Features:

- Isolates one signal in each direction
- Operates from 2.7V to 5.5V
- Buffered inputs - no external LED drive required
- Hysteresis at inputs for noise rejection
- Slew-limited drivers reduce EMI
- 3750V<sub>rms</sub> galvanic isolation from input to output
- Power down to Hi-Z does not load outputs
- 5 Mbaud data rate

### Applications:

- Isolated signal monitoring and control
- Power-over-Ethernet, POE
- Power supply high-side interface
- Logic level translation
- Microprocessor system interface
- Inter integrated circuit (I<sup>2</sup>C) interface
- Serial peripheral interface
- Full duplex communication
- Isolated line receiver
- Isolated data acquisition systems

## • DUAL HIGH SPEED DIGITAL OPTICAL ISOLATOR: CPC5002

- 3750V<sub>rms</sub> galvanic isolation from input to output
- Passes DC signals - no refresh clock needed

### Features:

- Dual optics isolate two signals
- **10 Mbaud** data rate
- Operates over 2.7V < V<sub>DD</sub> < 5.5V
- Power down to Hi-Z does not load outputs
- Low-power CMOS reduces supply current
- LED drive current only 1.5mA
- High speed: 10Mbaud typical

### Applications:

- Isolated line receiver
- Ground loop elimination
- ADC/DAC digital noise isolation
- 4-wire I<sup>2</sup>C bus isolation

# OPTOCOUPLEDERS

## • SINGLE & DUAL OPTOCOUPLEDERS

- Single-transistor output or Darlington transistor output for higher current gain
- Single-LED for unidirectional input signal or dual-LED input for bidirectional input signal
- Input-to-output isolation:  $1500V_{rms}$ ,  $3750V_{rms}$ , or  $5000V_{rms}$

### Features:

- AC and DC compatible inputs
- Machine insertable, wave solderable

### Applications:

- Modem switching (laptops, notebooks, PDAs)
- Voltage detection
- TIP/RING circuits
- Ringing detection
- Loop detection
- Current sensing
- Telecom switching

Part Number	Minimum Breakdown Voltage ( $BV_{CEO}$ )	Typical Current Transfer Ratio (%)	Maximum Saturation Voltage (V)	Input Control Current (mA)	Minimum Isolation Voltage ( $V_{rms}$ )	Package Type	Configuration

## • LINEAR OPTOCOUPLERS

- Input LED drives two photodiodes: (1) isolated output (2) feedback to correct for the input LED's non-linearity

### Features:

- Couples analog & digital signals
- 3750V<sub>rms</sub> input-to-output isolation
- Bandwidth >200kHz in photoconductive mode
- Bandwidth 40kHz in photovoltaic mode
- High gain stability
- Low input-to-output capacitance
- Low power consumption
- 0.01% servo linearity
- THD 87dB typical

### Applications:

- Power supply feedback voltage/current
- Medical sensor interfacing
- Isolation of process control transducers
- Isolated 4-20mA converters
- Telephony isolation

Part Number	Servo Gain K1=I <sub>1</sub> /I <sub>F</sub> (Min - Max)	Forward Gain K2=I <sub>2</sub> /I <sub>F</sub> (Min - Max)	Transfer Gain K3=K <sub>2</sub> /K <sub>1</sub> (Min - Max)	Input Control Current (mA)	Isolation Voltage (V <sub>rms</sub> )	Package Type

## Two fundamental operating configurations:

### Photoconductive Mode:

- Wide bandwidth (>200kHz)
- 8-bit linearity

### Photovoltaic Mode:

- 14-bit linearity
- 40kHz bandwidth

## Isolation Amplifier (Photovoltaic Mode)

## CPC9909: High Efficiency, High Brightness Off-Line LED Driver

- 8V to 550V input voltage range
- Linear or PWM brightness control inputs
- Drives multiple LEDs in series/parallel

### Features:

- >90% efficiency
- Stable operation at >50% duty cycle
- Regulated LED current
- Resistor-programmable minimum off-time
- Drives external power MOSFET, enabling high LED output current applications
- Buck or boost configuration

**IX9908, CPC9909**

## IX9908: High Voltage, Dimmable LED Driver with PFC Control

- Ideal for quasi-resonant flyback LED bulb designs
- Supports phase-cut dimming and power factor correction
- Multiple safety features ensure full system protection

### Features:

- Single stage, primary control with PFC and dimming features
- >90% efficiency
- >98% power factor
- Wide operating voltage range: up to 600V
- Digital soft start
- Cycle-by-cycle peak current control

# TELECOMMUNICATIONS PRODUCTS

## LITELINK™ SILICON DAA PHONE LINE INTERFACE

- Industry's only single-package silicon Data Access Arrangement (DAA)
- Ideal for both voice and data (V.22bis to V.90/V.92) applications in particularly dense circuit environments
- Internal optical isolation barrier eliminates high-cost transformer or capacitive isolation circuits
- Saves cost through reduced passive component count and smaller printed circuit board space
- Available in a thin 32-pin SOIC surface mount package

Part Number	Isolation Voltage ( $V_{rms}$ )	Power Supply (V)	Caller ID	Ringing Detect
CPC5622	3000	3.3 - 5	Continuous	Half-wave & full-wave
CPC5621	3000	3.3 - 5	Selectable ( $\overline{CID}=0$ )	Full-wave ( $\overline{CID}=1$ )
CPC5620	3000	3.3 - 5	Selectable ( $\overline{CID}=0$ )	Half-wave ( $\overline{CID}=1$ )

The 3kV<sub>rms</sub> internal isolation barrier exceeds all worldwide regulatory requirements. The LITELINK application circuit is capable of surviving 6kV (10μsec x 700μsec) lightning surge waveforms making it the most robust silicon DAA on the market.

LITELINK offers the lowest operational phone line quiescent current. The device easily interfaces to commonly available standard single-ended or differential voice and modem codecs on the market. Contact IXYS Integrated Circuits for information on codec reference designs that offer programmable AC termination impedance for global applications. LITELINK complies with international PSTN agency requirements.

### Features:

- Voice and data applications
- Modem DAA for speeds up to V.92
- Half-wave or full-wave ringing detection
- Worldwide telephone network compatibility
- Caller-ID reception
- Line side powered from telephone line
- 3.3V to 5V power supply
- Easy interface with modem ICs and voice codecs
- High power transmit option for voice applications (>3dBm)
- Small 32-pin SOIC package

### Applications:

- Computer telephony
- VoIP gateways
- PBXs
- Satellite set-top box
- V.92 modems
- Fax machines
- Voice mail systems
- Embedded modems
- Vending machines
- Automated banking
- Remote metering
- Surveillance
- Security systems

### CPC5622

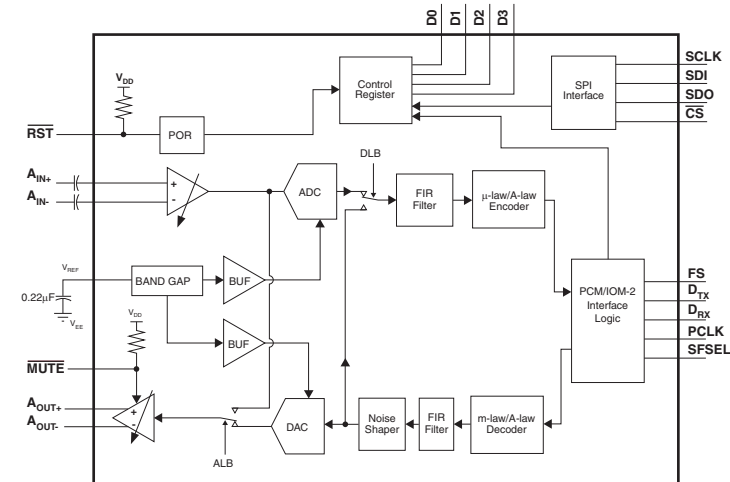

## • SINGLE-CHANNEL VOICE-BAND CODEC: CPC5750

### Features:

- $\mu$ -law and A-law ITU G.711 companding codec
- Operates on +3.3V power
- Differential analog signal paths
- Programmable transmit and receive gain, +/-12dB in 0.1dB increments
- Transmit path 60Hz rejection filter
- Differential amplifier drives +3.2dBm into 600 $\Omega$
- Stable gain over temperature
- PCM and IOM-2 GCI telecommunication interfaces
- Short and long frame syncs supported
- Independent transmit and receive programmable time slots
- Accepts PCLK from 512kHz to 8.192MHz
- SPI serial interface for control in PCM mode
- Programmable power down-mode,  $I_{DD} = 20\mu A$
- Analog and digital loopback modes for testing

CPC5750 Block Diagram

## • CALL PROGRESS TONE DETECTOR: M-980-02

- Detects common call progress tones including busy tone, dial tone, call waiting tones, and others
- Operates on a 2.8V to 5.5V supply

### Features:

- Receive common call progress tones
- The M-980-02 operates with a single 2.8-5.5 volt supply
- Linear input (detector)
- Inexpensive band detector with wide dynamic range (>38dB)
- Low power consumption

### Applications:

- PBX circuits
- Billing systems
- Test equipment
- Point-of-sale terminals

M-980-02: Call Progress Tone Detector

Part Number	Function (315 - 640Hz)	Package Types
M-980-02	Tone detector	16-pin SOIC, 8-pin DIP

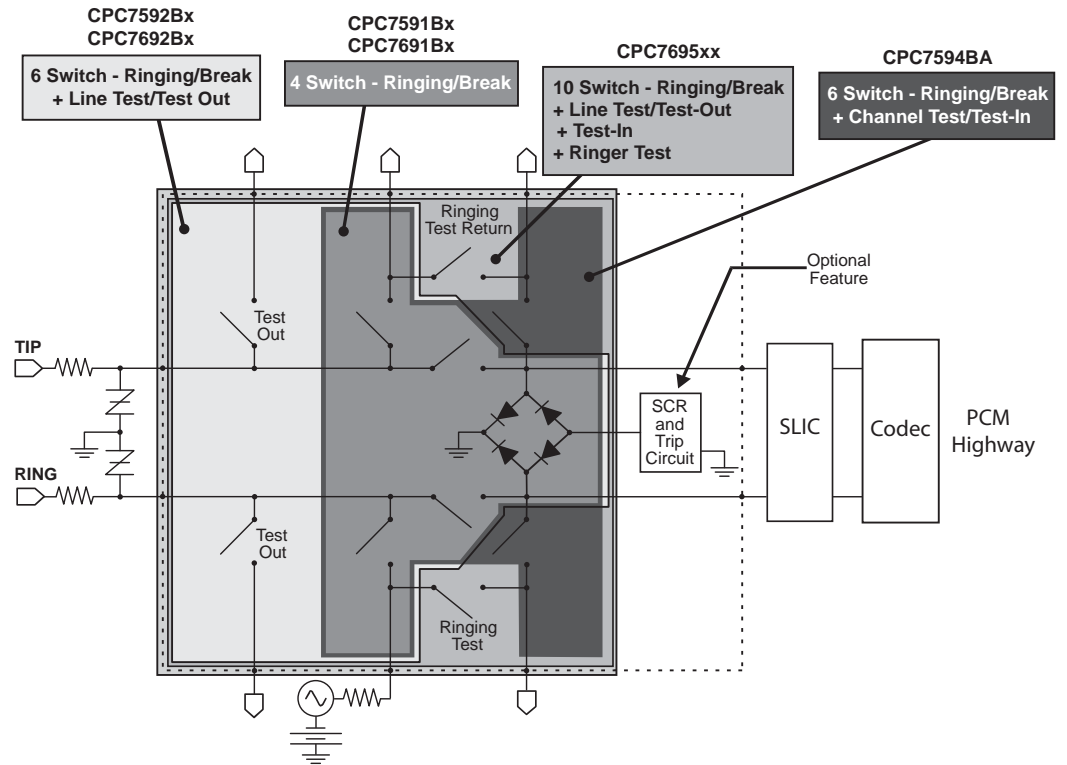

# LINE CARD ACCESS SWITCHES (LCAS)

## Features:

- Monolithic IC reliability
- Impulse noise reduction
- Low, matched on-resistance
- Built-in zero-cross ringing switching
- Small surface mount SOIC packages
- Ultra-low power consumption of <10.5mW
- Robust power-cross and lightning surge performance
- Current limiting, thermal shutdown, and SLIC protection

## Applications:

- PBX systems
- VoIP gateways
- Channel banks
- Pair gain systems
- Central offices (CO)
- Fiber in the loop (FITL)
- Hybrid fiber coax (HFC)
- Digital loop carriers (DLC)
- Digitally added main line (DAML)

## • LCAS FOR RINGING SLIC: CPC7508

- Next generation LCAS device used with ringing SLICs
- Replaces the two 2-Form-C electromechanical test relays used in fiber-to-the-home and optical network deployments
- Provides TIP and RING line break, drop test, and channel test functionality
- Requires only a single +12V supply

### Features:

- TTL logic level inputs for 3.3V logic interfaces
- Smart logic for power-up & hot-plug state control
- Monolithic IC reliability
- Low, matched  $R_{ON}$
- Clean, bounce-free switching
- Tertiary protection consisting of integrated current limiting and thermal shutdown for SLIC protection

### Applications:

- Fiber to the home (FTTH)
- Fiber in the loop (FITL)
- VoIP gateways
- PBX systems
- Digitally added main line (DAML)
- Hybrid fiber coax (HFC)

## • CYBERGATE™ DATA ACCESS ARRANGEMENT (DAA) MODULES

- Completely functional V.34 DAA circuit in a 1.07" x 1.07" x 0.4" plastic module
- Surge protection, transient protection Zener diodes, ringing detection, hook switch, gyrator, and a transformer
- Caller-ID (CID) and loop current detection are also available as options

Part Number	Region	Features				
		Ringing Detection		Caller ID	Loop Current Detect	2-4 Wire Conversion
		Full Wave	Half Wave

### Features:

- 28.8kbps
- Optional caller ID and loop current sense
- Ringing detection
- Low power hook switch
- Surge protection
- Gyrator circuitry
- Meets most regulatory agency requirements

### Applications:

- Modems
- Remote data acquisition
- Fax machines
- Security/metering
- Computer telephony
- PBX
- Voice mail systems

### Small Package Size!

1.07" x 1.07" x 0.4"  
 27.18mm x 27.18mm x 10.16mm

## • DC TERMINATION ICs (xDSL, ISDN)

### CPC1465: SHDSL/ISDN

- Polarity-insensitive DC termination for wetting (sealing) current on the CPE side
- Conforms to ITU-T G.991.2 to eliminate corrosion on G.SHDSL/ISDN lines
- Well controlled turn-on and turn-off minimizes injecting impulse noise into the G.SHDSL channel

#### Features:

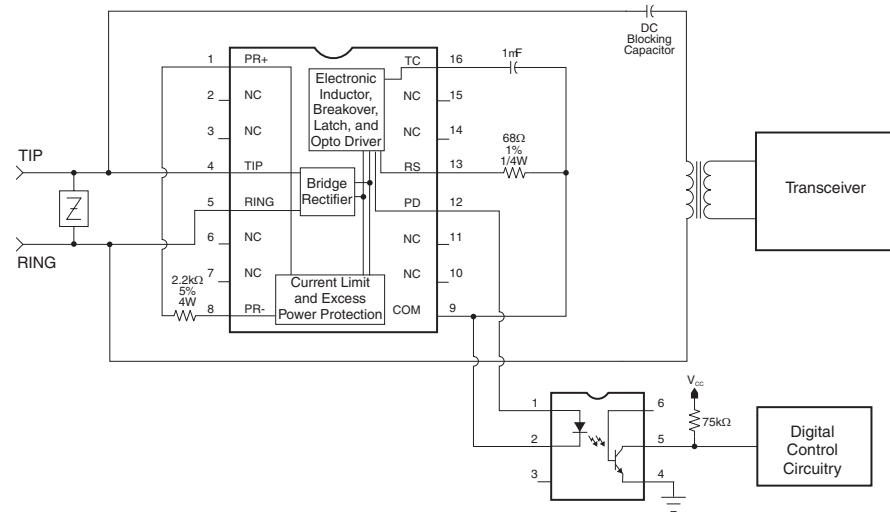

- Integrated bridge rectifier for polarity correction
- Uses inexpensive optocoupler for DC signaling
- Electronic inductor, breakover, and latch circuits
- Current limiting and excess power protection circuits
- ANSI SHDSL and ISDN compatible
- MLT and SARTS compatible
- Excellent linearity (70dB typ.)

#### Applications:

- G.SHDSL
- ISDN
- Router and bridge customer premises equipment
- Leased line equipment
- T1/E1 network line cards and repeaters
- Network termination 1 (NT1) equipment
- Mechanized loop test (MLT) networks
- Switched access remote test system (SARTS) networks

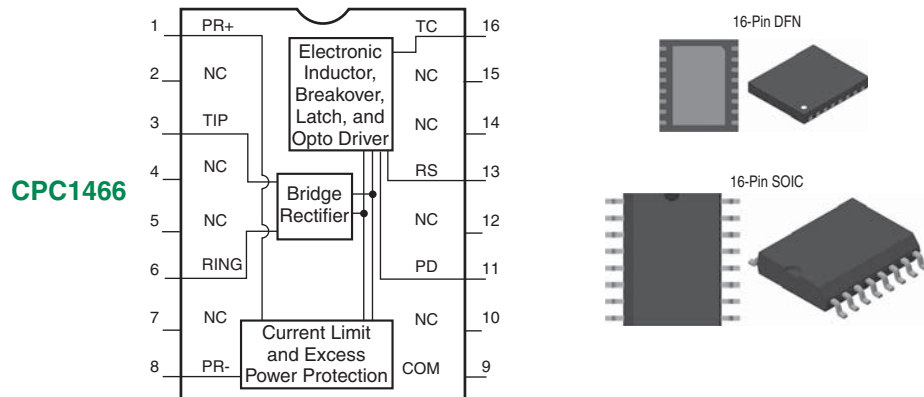

### CPC1465 & Application Circuit

### CPC1466: Broadband ADSL/VDSL

- DC Termination IC for broadband ADSL/VDSL applications
- Eliminates phone line corrosion on DSL twisted-pair, broadband-only lines

#### Features:

- Meets wetting (sealing) current requirements per ITU-T G.992.3
- Integrated bridge rectifier for polarity correction
- Uses inexpensive optocoupler for DC sealing current monitoring
- Electronic inductor, breakover, and latch circuits
- Current limiting and excess power protection circuits
- ADSL/VDSL compatible with low-pass filter network
- MLT and SARTS compatible
- Compatible with portable test sets

#### Applications:

- ADSL/VDSL broadband modems
- Router and bridge customer premises equipment
- Leased line equipment
- Mechanized loop test (MLT) networks
- Switched access remote test systems (SARTS) networks

## • TELECOM MULTIFUNCTION PRODUCTS (GENERAL PURPOSE MULTIFUNCTION PRODUCTS - PAGE 18)

Multifunction devices allow designers to consolidate circuit functions into a single device, freeing up valuable board space and reducing component count. Designed specifically for the telecommunications industry, the Integrated Telecom Circuit (ITC) series is well suited for voice telephony and modem applications, providing most of the major functions required when designing DAA (Data Access Arrangement) or voice (FXO) line interface circuits. Available in a 16-pin SOIC package.

No Zener Protection  
Bidirectional Opto-Input

ITC117(L)

Zener Protection  
Unidirectional Opto-Input

ITC135

Zener Protection  
Bidirectional Opto-Input

ITC137

### Features:

- 3750V<sub>rms</sub> input-to-output isolation
- Multiple functionality in a single package
- Current limiting (part numbers with "L" suffix)
- Machine insertable, wave solderable
- TTL and CMOS compatible

### Applications:

- Telecommunication/datacommunication
- Instrumentation
- I/O subsystems
- Electronic switching
- Medical equipment (patient/equipment isolation)
- Security
- Aerospace
- Industrial controls

Part Number	Relay Parameters				Optocoupler Parameters				Isolation Voltage (V <sub>rms</sub> )	Package Type	Features

ITC137P	350	120	15	5	20	33	0.5	6	3750	16-pin SOIC	Full-wave ringing detect

## • LINE SENSE RELAY: M-949-11

### M-949-11 Balanced Dual Coil Telephone Line Current Sensing Relay

- Senses telephone line current from 15mA to 200mA
- Used by control circuitry for:
  - On-hook/off-hook monitoring
  - Switch hook flash detection
  - Rotary dial pulse
- Meets high isolation voltage requirement of 4000V
- Meets UL and British Standard Specifications
- Includes 1-Form-A relay contact

# VOLTAGE MONITORING & SENSING ICs

## VOLTAGE MONITORING DEVICES

### CPC5712

- Special-purpose “Voltage Monitor with Detectors” integrated circuit used in high voltage telephony applications
- Derives two voltage level detects, polarity information, and a scaled, linear representation of the phone line voltages
- Non-telephony applications include instrumentation and industrial controls; virtually undetectable in use

#### Features:

- 2 independent, programmable level-detectors with programmable hysteresis
- Fixed-level polarity detector with hysteresis
- Differential linear output
- Excellent common-mode rejection ratio (CMRR)
- Worldwide telephone network compatibility
- Minimum external components
- High differential input impedance, very low common-mode input impedance
- Fixed gain, 3V to 5.5V operation
- Low power consumption
- CMOS logic level output (TTL compatible)

#### Applications:

- VoIP gateways, IP-PBX, xDSL
- TIP/RING monitoring: polarity detection for caller ID, enhanced 911, line-in-use, battery detection, PSTN check

Resistors set the Voltage Level Detect Thresholds

### CPC5710

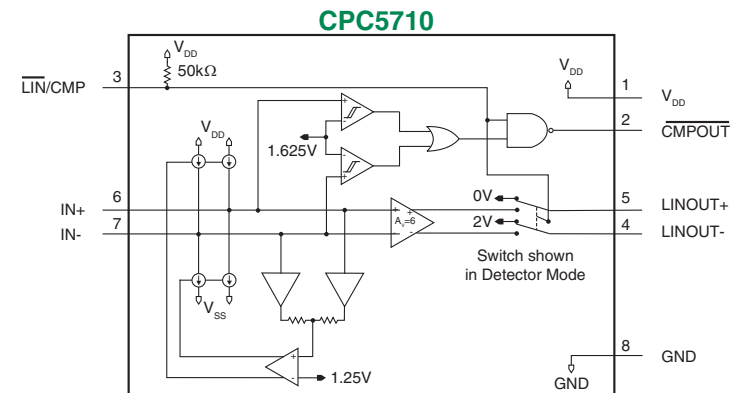

- Telephone line monitor circuit provides linear representation of phone line signal and a ringing detect signal
- Ringing detect signal is set by external resistor network

#### Features:

- Differential or single-ended linear output
- Full-wave ringing level detector comparator with internal threshold, large hysteresis, and TTL logic level output
- High common-mode rejection ratio (CMRR)
- Worldwide telephone network compatibility, virtually undetectable in use
- High differential input impedance, very low common-mode input impedance
- Fixed gain, 3.3V or 5.5V operation
- CMOS logic level output (TTL compatible)

#### Applications:

- Display feature (caller ID) signal buffering
- Line-in-use detection (another-phone-off-hook)
- Battery presence monitoring
- TIP/RING voltage monitoring
- Line polarity

## • LOW VOLTAGE ERROR AMPLIFIER WITH A HIGH VOLTAGE DARLINGTON TRANSISTOR: IX9915

The IX9915 integrates an error amplifier with a precision reference and a 350V Darlington transistor in a single package. The error amplifier can be operated from 1.3V to 12.5V over the operational temperature range. The breakdown voltage of the Darlington transistor is 350V.

The integrated combination of a 4-terminal 431 type shunt regulator with a high voltage Darlington transistor is ideal for use in LED lamp bleeder control circuits.

### Features:

- Precision reference, error amplifier, and a high voltage Darlington transistor in a single package
- 1.299V±1% reference @ 25°C (±1.5% @ -40°C to 85°C)
- Error amplifier supply voltage range: 1.3V to 12.5V over temperature
- Breakdown voltage of Darlington transistor: 350V

### Applications:

- LED lamps
- Low voltage power supply feedback
- AC-to-DC off-line power supplies
- DC-to-DC converters

### IX9915 Application Diagram

The high voltage Darlington transistor will bleed the current when  $V_{LINE}$  is lower than the predetermined voltage. The 4-terminal 431 type shunt regulator is used to monitor  $V_{LINE}$  voltage and control the Darlington transistor bleeding the current (ON) or not (OFF). When  $V_{LINE}$  reaches the predetermined voltage, the shunt regulator starts to regulate to drive  $V_{OC}$  going low, and turns off the Darlington transistor to make sure this bleeder circuitry only burns a little power at the higher  $V_{LINE}$  voltage. Maximum bleeding current  $I_H$  can be controlled by properly choosing  $R_E$  and  $V_{REG}$ .

# OPTICALLY ISOLATED ERROR AMPLIFIERS

## Features:

- Low voltage operation:
  - 1.6V: LIA135 & LIA136
  - 2.7V: LIA120 & LIA130
- Optocoupler, precision reference, and error amplifier in a single package
- LIA120: 70dB linearity typical

## Application:

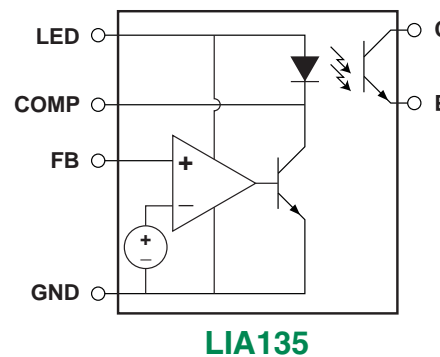

- SMPS feedback loops
- Power supply feedback

## Optical Feedback for Ultra-Low-Voltage Power Supplies

Part Number	Reference Voltage (V)	V <sub>REF</sub> Tolerance			Isolation Voltage (V <sub>rms</sub> )	Package Type

## • RFID TAGS

### **NCD1015ZP: Low Frequency, Half-Duplex, Robust 50mm Transponder**

- Read-only RFID device for single transponder applications in the area of electronic identification
- Supports ISO 11784 and ISO 11785 standards

The passive transponder uses the applied RF signal to obtain the energy needed to send the 64-bit ID code to the reader. Return data transmission from the transponder to the reader utilizes FSK encoded modulation.

- |                                  |  |
|----------------------------------|--|
| Air interface                    | • Contact-less, sequential power & data transmission (HDX) |
| Radio frequency center frequency | • 134.2 kHz  |
| Tag-to-reader transmission       | • FSK modulation, NRZ: "0" ~ 134.4kHz; "1" ~ 124.2kHz      |
| Tag-to-reader data rate          | • RF/16 (~8kbits/sec)                                      |
| On-chip 16-bit CRC generator     | • Reverse CRC-CCITT as used in ISO/IEC 11785               |
| Identification data              | • 64 bits data + 16 bits CRC                               |

### **NCD1015M: Low Frequency, Half-Duplex RFID Integrated Circuit**

- HDX (R/W) RFID device for single transponder applications in the area of electronic identification
- Supports ISO 11784/85 standards

The NCD1015M contains an ASIC and 2 internal capacitors: one, a resonant capacitor, and the other a storage capacitor. The ASIC contains 3 memory blocks of 32 bits each, based on field programmable, non-volatile EEPROM. Each block contains 32 data bits. Blocks 1 and 2 are referred to as the 64-bit identification data page 1, which is secured by an associated 16-bit CRC. Block 0 offers the option to lock the RFID device. Once the device is locked, it is compatible with ISO 11784/85 standards.

The HDX transponder IC receives Write-Block requests from the reader as a pulse interval encoded, 100% amplitude modulated data signal.

Return data transmission from the transponder to the reader utilizes FSK encoded modulation. This is achieved by a serial data stream controlled Frequency Shift Keying (FSK) of the transponder's resonant circuit oscillation with an additional on-chip modulation capacitor between the two transponder terminals HF and GND. The passive transponder uses the supplied RF signal to obtain the energy needed to send the 64-bit ID code to the reader.

# DIGITALLY PROGRAMMABLE CAPACITORS

## • WIDE CAPACITANCE RANGE, NON-VOLATILE, DIGITAL PROGRAMMABLE CAPACITOR: NCD2400M

The NCD2400M is a dedicated electronic calibrator for oscillators, with reliable performance at 105°C as required by OCXO applications.

This product can be used in series or shunt configuration, to support a wide variety of tuning circuit topologies.

Digitally controlled capacitance trimming information is communicated via a 2-wire (I<sup>2</sup>C compatible) interface. The calibration value can be stored in the internal, re-programmable, non-volatile memory.

### Features:

- Operating frequency range of DC to 150MHz
- 512-state digital programmable capacitor
- Series and shunt configurations supported:
  - $C_{\text{shunt}} = 12.5\text{pF to } 194\text{pF}$  (15.6:1 tuning ratio) in discrete 355fF steps
  - $C_{\text{series}} = 1.7\text{pF to } 194\text{pF}$  in discrete 376fF steps
- Operation at 105°C
- 2-wire (I<sup>2</sup>C compatible) serial interface
- EEPROM non-volatile memory
- Wide power supply range (2.5 to 5.5V)
- 2 x 2 x 0.65 mm 6-pin DFN package, MSL 1

### Applications:

- OCXOs
- VCXOs
- Crystal oscillators
- Tunable RF stages
- RFID tags
- Industrial wireless control
- Capacitor sensor trimming

DFN package: 2mm x 2mm

## • NON-VOLATILE DIGITAL PROGRAMMABLE CAPACITOR: NCD2100

The NCD2100 is an EEPROM-based digitally programmable variable capacitor that provides capacitive offset trimming for capacitance sensitive circuits. Programming the non-volatile EEPROM register value or implementing on demand capacitance value changes are easily accomplished by means of the simple two-wire serial bus.

Providing 1024 discrete capacitance values over a nominal value range of 6.6pF to 37.553pF with very small step sizes, the NCD2100 is well suited to ensure proper operation of capacitive critical circuits. Additionally, to ensure interoperability over a broad array of design environments, the device is rated for operation with supply voltages of 2.5V to 5.5V across the temperature range of -40°C to +85°C.

### Features:

- Operating frequency range 200kHz to 250MHz (contact the factory for operation at higher frequencies)
- 1024 programmable capacitance values
- Capacitance range 6.6pF to 37.553pF
- Very small CDAC3 capacitance step size: 63fF
- Operating temperature range: -40°C to +85°C
- Operating supply voltage: 2.5V to 5.5V
- Device size: 2mm x 2mm (DFN-6), 2.9mm x 2.8mm (TSOT-6)

### Applications:

- VCXOs
- Crystal oscillators
- Tunable RF stages
- RFID tags
- Industrial wireless control
- Capacitor sensor trimming

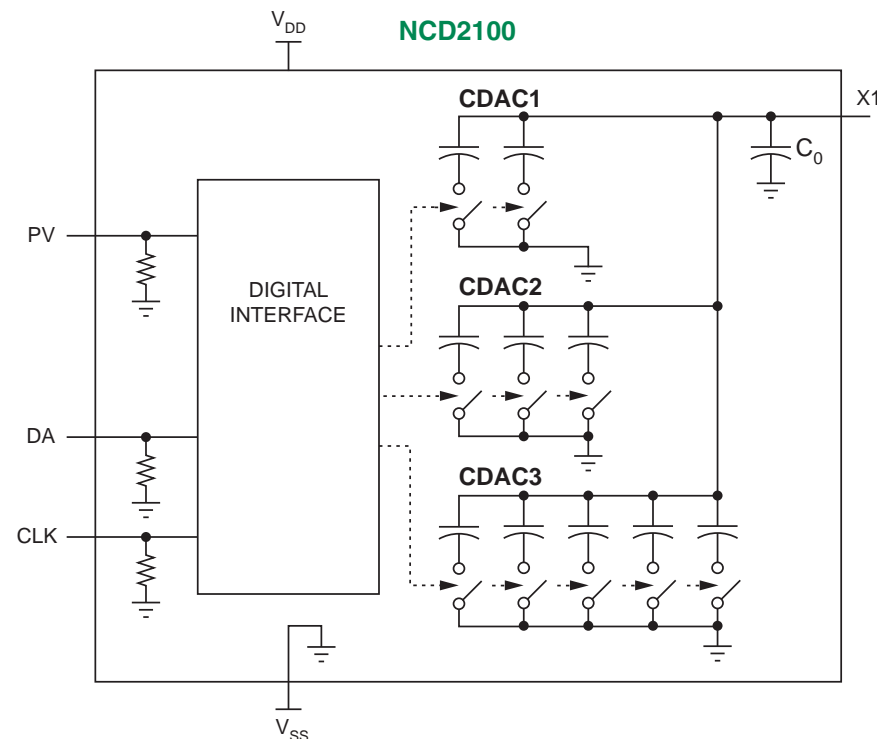

DFN package: 2mm x 2mm

TSOT package: 2.8mm x 2.9mm

Capacitance range: 6.6pF to 37.553pF
