

Part Number: 8.06.16 J-LINK 6-PIN NEEDLE AD

Description: J-Link 6-pin Needle Adapter

The J-Link 6-pin Needle Adapter has been designed to connect the J-Link/Flasher to a PCB which does not come with a mating connector or programming header. The designed pattern with 3 locating pins ensures, that the adapter cannot be connected the wrong way. The Needle Adapter allows manufacturers to save costs and space on their PCBs since there is no need to provide the PCB with additional connectors. It adapts from the 20-pin 0.1 inch to a 6-pin needle connector.
